

ABSTRACT OF THE DISCLOSURE

A stringed musical instrument is provided wherein each string has two critical points. A fulcrum tremolo is mounted on the instrument for varying the tension of the strings and the distance between the two critical points. The strings are attached to a plurality of intonation modules mounted on the fulcrum tremolo. Each intonation module is adjustable so that the strings can be adjusted from an untensioned state to a proper playing pitch. A bearing assembly is also included to facilitate pivoting of the fulcrum tremolo.
